

## **FLDI Announces Additional Services Provided to Arizona State Credit Union**

Austin, Texas, January 30, 2008 – First Lenders Data, Inc. (FLDI), an Austin, Texas-based provider of bundled mortgage settlement services, announced today that it has expanded its service offering to Arizona State Credit Union to include Flood Zone Determinations, Automated Valuation Models (AVMs), Legal and Vesting Reports, Limited Title Searches as well as the alternative lien service-Equiguard.

“We are excited about expanding the products and services we order from FLDI,” said Cindy Campano, VP Member/Retail Lending for Arizona State Credit Union. “By bundling multiple products and services together, our credit union saves time and money in several ways. The fees are lower, our processors are more efficient, and we can close loans faster. The main benefit we receive from FLDI, however, is their emphasis on customer service. Someone is always there to help us. FLDI helps us achieve our ultimate goal of providing our members with lower fees and better overall service.”

Arizona State Credit Union has been using the services of FLDI through several ordering options, including the FLDI web based bundled service platform and interfaces with Arizona State’s loan origination systems. The elimination of duplicate data entry combined with the cost savings and customer service focus of both companies provides a win-win-win for FLDI, Arizona State Credit Union, and its members.

“Providing time and cost savings to Arizona State is important, but providing great customer service is what we do best,” said Tedd R. Smith, President and Chief Executive Officer of First Lenders Data, Inc. “Reducing costs and helping credit union members close their loans with greater efficiency and simplicity reassures us that we are doing the job we set out to do.”
