RELEASE NOTES – 04.25.2024

Improvements

In the following sections, we will discuss the updates made to the POS 2.0 system, including the Digital Application and Borrower Portal. We will also cover any improvements made to third-party providers, if applicable, as well as any global updates. These updates are for both Loan Origination System (LOS) integrations. We will highlight the improvements made to the system's capabilities and user interface/experience. Each improvement will be categorized based on its unique Loan Origination System integration.

Global Improvements

Issue Key	Type	Component	Summary
POS-2278	Story	Borrower Portal	Ability to pull the loan card's hover color from the lender's config
POS-1979	Story	Digital Application	Ability to enlarge the content in the footer by hovering over the section
POS-1639	Story	Digital Application	Ability to toggle Confetti on View My Offer page on and off
POS-1588	Story	Digital Application	Implemented logic to make FullStory config not a requirement for POS system to render a POS webpage

Glossary

Story: The story ticket type represents a new feature or an enhancement to an existing feature.

Bug: The bug ticket type represents a defect in a feature, user interface, or user experience.
