

RELEASE NOTES – 04.01.2024**Settlement Services:**

- The Closing Exchange - Loan Types
 - Updated integration to include Closing Type in order requests, so that it reflects on reports pulled from the Closing Exchange.
 - When creating a Notary Closing or RON order with The Closing Exchange, the Closing type listed here will now be passed to the Closing Exchange:
 - Available Closing Types:
 - Line of Credit (LOC)
 - HEL

- Stavvy (fka Evolve) - Closing Package added to FirstClose One
 - A new closing package type has been added to FirstClose One, and can be ordered through the Stavvy integration in Equity IQ 2.0.
- Ascendant - Property Report County Validation
 - To support Cyprus Ascendant's county validation logic for Property Report order requests, we have updated our integration to use standardized county names. This change only affects API requests on the backend and does not affect the county name listed on the loan file in FirstClose One.
