Sprint 34 Release

JIRA

- Sprint 34

Ordering & Checkout

- Updated the experience during check-out when applying filters and navigating back and forth between pages

Process Refinement

- Addressed bug ticket related to multiple documents being uploaded on completed orders

Products

- Addressed bug ticket related to deliverable validations related to the eValuation product
- Based on feedback during the Pilot, we've removed the mapping of the estimated value to Field Id 1821 from all Valuation products. The estimated value will continue to be mapped to the custom field, CX.FC.ESTIMATEDVALUE, and the Lender is able to map to the appropriate field (1821 or 356) using rules within Encompass.
- Onboarded the following products
  - CoreLogic FlexCert Flood Certificate
  - CoreLogic Life of Loan Flood Certificate
  - CoreLogic HVE1 AVM
  - CoreLogic THV AVM
  - Priority Title & Escrow Full Alta
  - Property Insight Property Report
  - Village Settlements Full Alta

Order Messages

- Addressed bug ticket when the error message was initially being displayed right after the Provider order was created
