RELEASE NOTES – 03.06.2025

Improvements

In the following sections, we will discuss the updates made to the POS 2.0 system, including the Digital Application and Borrower Portal. We will also cover any improvements made to third-party providers, if applicable, as well as any global updates. These updates are for both Loan Origination System (LOS) integrations. We will highlight the improvements made to the system's capabilities and user interface/experience. Each improvement will be categorized based on its unique Loan Origination System integration.

Feature Toggle: Represents features that need to be configured or toggled on before it is available in the application. Please contact your Account Manager to learn more.
